

Wee Curve DV

The Wee Curve DV is a 'direct-vented' fire that delivers a peak heat output of 15kW to warm your home. Euro styling with a smooth curved ashlip, cooktop and panoramic curved window ensuring the perfect flame view from any angle. The radiant cooktop offers ample space for a pot or kettle.

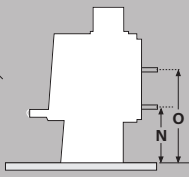

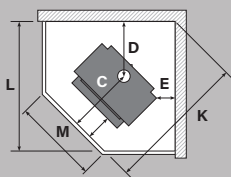

Direct Vent technology allows combustion air to be pre-heated before entering the firebox, allowing for greater combustion temperatures, lower emissions and higher operating efficiencies. Venting options to connect the air supply through a specific wall, floor or ceiling kit.

	Clean air approved model
Heat output	15kW peak heat output
Heating area	Heat up to 150m ² / 3 bedroom home
Finish	Metallic black high temperature paint
Wetback	N/A
MfE#	093460 (DRY)
Emission	0.60gms (DRY)
Efficiency	68% (DRY)
SKU	200-0600

Specifications were correct at the time of printing but may alter and those detailed should be used only as a guide. If in doubt, please consult your local Metro Fires stockist. Peak heat outputs (kW) are based on the NZHHA test method using dry pine with testing undertaken by independent International Accredited New Zealand (IANZ) testing facilities.
